

*Do you have experience working in the construction or precast concrete industry with exposure of championing quality management systems and processes?*

*Are you looking to join an industry leader, where you will have the chance to further progress and develop a career in quality management?*

*Are your degree qualified in civil engineering, concrete technology or related field?*

We are seeking an **Assistant Quality Manager** to join our team. Based at our manufacturing facility in Ilkeston, Derbyshire, you will be assisting our Technical and Quality Manager in all aspects of quality assurance and control.

### **Who we are**

Tracey Concrete is a precast concrete manufacturing company supplying precast concrete products throughout UK, Ireland & Europe. Products manufactured include Jacking pipes, spigot & socket pipes, manhole chambers, cover slabs, caisson rings, preformed perfect bases and more.

### **What you'll be doing**

Assisting our Technical and Quality Manager and working collaboratively with our Quality and Production teams, you'll play a pivotal role in:

- Developing, implementing and maintaining a comprehensive quality management system for precast concrete manufacturing.
- Establishing and monitoring quality control procedures, ensuring adherence to industry standards, regulatory requirements and customer specifications
- Sampling and testing of aggregates, fresh concrete, hardened concrete and finished products.
- Conducting regular inspections and audits to assess product quality at various stages of production.
- Collaborating with production teams to identify and address quality issues, implementing corrective and preventative actions.
- Managing the calibration and maintenance of inspection equipment to ensure accuracy and reliability.
- Providing training and guidance to colleagues on quality standards, procedures and best practices
- Investigating and resolving customer complaints relating to product quality, working towards continuous improvement.
- Staying updated on industry trends, standards and regulations to ensure compliance and enhance product quality.

### **What you'll need to succeed**

- Degree in civil engineering, concrete technology or related field
- Knowledge in concrete materials, concrete mix design, concrete and aggregate testing
- Familiarity with relevant industry standards, codes and regulations
- Strong communication skills, to convey information (verbal and written) clearly and concisely.

- Strong interpersonal skills, to build relationships and engage others to work together to make sure our products meet customer, industry and company standards.
- Excellent analytical and problem-solving skills to identify problems and develop solutions.
- Microsoft Office skills

**What you'll receive in return**

Competitive salary dependent on experience

Professional growth and development

25 days holiday

Company pension scheme

Free on-site parking

Health benefit scheme

Life Assurance

Employee Assistance Programme
