

Tracey Concrete are recruiting for a **Precast Production Engineer**:

As a Precast Production Engineer, you will be responsible for:

- Overseeing and supervising the production of precast concrete products
- Fabrication & design of moulds for precast concrete products
- Assisting with management of plant and machinery maintenance
- Providing technical and engineering support to the technical team and operating areas as required
- Liaising with production and despatch personnel
- Liaising with internal and external customers, contractors, and consultants
- Being involved in product and solution development in liaison with the technical and onsite construction teams
- Production of drawings for a wide range of structures and structural elements
- Ensuring work output conforms to specifications, ISO standards and production quality standards
- Ensuring Health & Safety standards are maintained at all times
- Keeping up-to-date technically and applying new knowledge to the role
- Meeting agreed deadlines for all tasks
- Carrying out any other reasonable request made by your Line Manager to support departmental or company objectives

Essential Criteria:

- HNC, HND/BEng, BSc, or similar degree in Construction/Manufacturing/Structural/Civil Engineering
- Proficient in AutoCAD
- Competent in Microsoft packages
- Strong communication and organisation skills
- Ability to work on your own initiative with minimal supervision
- Customer focused approach in all environments

Desirable Criteria:

- 1/2 years Post qualification experience
- Experience in precast concrete design and detailing
- Experience of working in the Construction industry would be a distinct advantage

Working Hours: Monday-Friday 8:30am-5:30pm

Location: Enniskillen, Co. Fermanagh

Salary: Dependant on experience
